

LIBRARY SCIENCE

Course Framework

Library Science Course Framework

South Dakota Department of Education
SouthDakotaStateLibrary

Revised September 2017

Introduction

Library Science (code 22053) is a recognized high school course within the South Dakota state system. As with any course, it is suggested that the syllabus includes clear expectations and grading procedures.

The course description states:

Library Science provides students an opportunity to work in the library or media center.

Duties may include the following:

- *collecting, distributing, and categorizing materials*
- *utilizing educational technology and social networking*
- *assisting students and teachers*
- *performing clerical duties*

Students learn strategies for teaching others while gaining experience in library science and educational technology.

The following framework is intended to serve as a guide or "menu" for school districts to use in designing a local Library Science course. It is a **starting point** to check for information and resources in building a course syllabus. Offering a Library Science course allows students to explore the possibility of a future career while gaining real-world experience.

For more information, please contact the School Library Technology Coordinator.

Library Science Course Framework

Course Goals

Explore career possibilities

- librarian (school, public, academic, special)
- educator
- technology specialist
