

READsquared App for Apple and Android Installation How To

Libraries can now offer their patrons the opportunity to participate via an app in addition to their mobile website. The app presents the libraries unique customized solution in an app including all unique branding, customizations, programs, functions, and features.

Mr. Young, READsquared’s president, explained their goal was not to create a “companion app” with limited functionality but to present each library’s unique READsquared site seamlessly in an app.

As librarians perform customizations and branding, offer new features, and present new programs they are immediately available within the app. As patrons join and log activity all information is instantly available in both the website and app allowing individuals, groups, parents, and children to switch devices as needed for logging at home and on the go.

Search for READsquared in the Apple or Google Play Store and Click Get or Install

Type in the name of your library

Login if you already have an account or register

Your registration options will be the same in app as on the website

All modifications made from the control room will reflect in app and patron actions in app will show on the website
